ABSTRACT

This annual survey presents salary and wage data on 23 professional and 10 support positions in the following categories: central office administrators, school building-level personnel, classroom teachers, auxiliary professional personnel, and support personnel. The positions selected represent the full scope of public-school employment. The data were collected from 687 public school systems in fall 2001 for the 2001-02 school year. The data in this report are presented in tabular form and organized into three major sections: (1) changes in salaries scheduled and paid from 1991-92 to 2001-02; (2) salaries and wages paid professional and support staffs in 2001-02; and (3) scheduled salaries for professional personnel for 2001-02. Explanatory notes and noteworthy findings are presented at the beginning of each section. Also included are year-to-year, 5-year, and 10-year information on trends in public-school salaries and wages, with comparisons with the consumer price indices for each period. Appended are details on how the data were collected; summary tables; summary figures; a glossary of terms; additional resources; and a worksheet for compiling local school system composite-indicator-of-change data and comparative composite-indicator-of-change data.
